

O/1-10V Rotary Panel Dimmer

Model No.: KL

Rotary dimming/O-10V or 1-10V/AC relay output/Wireless remote control

Features

- Rotary panel O/1-10V dimmer, 1 channel output.
- Output 1 channel O/1-10V signal, connect with O/1-10V dimmable driver.
- High voltage AC input, High voltage AC relay output.
- O-10V or 1-10V output selectable by DIP switch.
- Rotate knob to change brightness, support push and long push operation.
- Compatibility with RF 2.4G dimming remote control.

CE RoHS EMC LVD

Technical Parameters

Input and Output	
Input voltage	AC100-240V
Output voltage	AC100-240V
Output signal	O/1-10V (20mA)
Output current	Max 1.5A (AC)

Safety and EMC	
EMC standard (EMC)	EN 55015:2013 EN 61547:2009 EN 61000-3-2:2014 EN 61000-3-3:2013
Safety standard (LVD)	EN 61347-2-11:2002 EN 61347-1:2015 EN 62493:2015
Certification	CE, EMC, LVD

Warranty	
Warranty	5 years

Dimming data	
Input signal	Rotary knob + RF 2.4GHz
RF Control distance	30m
Dimming level	256 levels
Dimming range	0-100%

Environment	
Operation temperature	Ta: -30°C ~ +55°C
Case temperature (Max.)	Tc: +65°C
IP rating	IP20

Weight	
Net weight	0.100kg
Gross weight	0.160kg

Mechanical Structures and Installations

Wiring diagram

- Connect with O/1-10V dimming driver (no use AC OUT)

- Connect with 0/1-10V dimming driver (use AC OUT)

- Connect with 0/1-10V dimming driver (use AC OUT and relay or contactor)

An additional AC relay or contactor is needed when total input current of the load is higher than 1.5A or inrush current is greater than 15A.

Note: We recommend the number of LED drivers connected to 0/1-10V dimmer does not exceed 10 pieces, The maximum length of the wires from dimmer to LED driver should be no more than 15 meters.

Knob function

- Push: Turn on or off light.
After turn on light:
- Rotate: Rotate knob to adjust brightness, 2.5 turns, 50 levels.
- Long push(1-6s): Continuous 256 levels brightness adjustment.

Match Remote Control (two match ways)

The 0/1-10V rotary panel dimmer can also match with the RF dimming remote (optional).

End user can choose the suitable match/delete ways. Two options are offered for selection:

Use Knob

Match:

Turn on light, turn off, immediately push the knob for 5s, immediately press on/off key(single zone remote) or zone key(multiple zone remote) of the remote.

Delete:

Turn on light, turn off, immediately push the knob for 10s, delete all matched remotes.

Use Power Restart

Match:

Switch off the power, then switch on power again, immediately short press on/off key (single zone remote) or zone key (multiple zone remote) 3 times on the remote. The light blinks 3 times means match is successful.

Delete:

Switch off the power, then switch on power again, immediately short press on/off key (single zone remote) or zone key (multiple zone remote) 5 times on the remote. The light blinks 5 times means all matched remotes were deleted.

0-10V or 1-10V dimming setting

Select 0-10V dimmer or 1-10V dimmer according to dimmable LED driver.

0-10V Dimmer

1-10V Dimmer

Note:

When the output channel is off, the output dimming signal is 0V or 1V. Please read the dimming section of the dimming driver manual. If the dimming characteristic curve is the same as right, you must select 1-10V dimmer and use AC OUT function, otherwise you can't turn off the lights.
